Deep Wisdom House is a company that fuses art house, philosophy club and coding workshop to create, share and evolve transformational beauty and wisdom.

It brings together multimodal art, storytelling, perennial philosophy, symbolic systems, AI-assisted production, physical craft, installation design and the rich diversity of world cultures. Its work moves between gallery, studio, digital platform, residency and apprenticeship, with Timescape as its flagship living environment.

The House creates artworks, stories, systems and architecturally living ecosystems where images, movement, sound, code, objects, spaces and human judgement meet in coherent form.

Located on beautiful Waiheke Island and amidst the East-West vibrancy of Auckland CBD, Deep Wisdom House works from a setting where natural beauty, university life, Pacific openness and global cultural exchange meet. The House is developing its studio and communal spaces as working environments for creative play and meaningful exchange. Dance, yoga and contemplative practice sit alongside our living creative projects.

Founded by Dai Léon, Zen Sifu and author of *Origins of the Tarot: Cosmic Evolution and the Principles of Immortality*, Deep Wisdom House carries decades of inquiry into perennial wisdom, symbolic systems, holistic education and cultural transformation. Its work now extends through Timescape, physical theatre and installations, AI-integrated assistance and apprenticeship-based creative development.

The House welcomes aligned collaborators, artists, technologists, educators, patrons and cultural partners who recognise that beauty, intelligence and responsible technology now need places where they can be practised together.
